

EG3-400 Hydraulic Bench Hole Puncher

Innovators in
Precision
Hydraulic Hole
Punching
Equipment

The EG3-400 hydraulic punch is ideal for sheet metal fabricators, repair workshops and electrical manufacturers. The EG3-400 punches round and square holes in sheet metal, stainless steel, copper, brass and aluminium. Dies and cutters can be easily changed in a matter of seconds. The unit has a locating centre-pin so the operator can punch holes accurately on the work piece.

Made in Japan, Kamekura hydraulic hole punchers are precision manufactured tools giving a life time of reliable service to any tradesman requiring to penetrate holes in sheet metal, stainless steel, copper, brass and aluminium.

Kamekura hydraulic equipment is extensively used in fields such as electrical switchboard manufacturer's, plumbing/sink ware distributors and manufacturers, plant system operations and general sheet metal workshops.
