

EVK-100 Cordless Hydraulic Hole Puncher

Innovators in Hydraulic Hole Punching Technology for Over 45 Years

MADE IN JAPAN

The Cactus EVK-100 Cordless Hole Punch is designed to punch through 3.2mm mild steel, 2.4mm stainless steel & 5mm aluminium material in any working position for on-site or high production applications.

The EVK-100 punching head is powered by a reliable Panasonic 14.4V Li-Ion 4.2 amp hour battery & motor which requires minimal effort to operate and provides a professional finish with no burr to the work piece after every operation.

This unit has been supplied to the global construction & manufacturing markets and continues to be used by ship building, switchboard, plumbing, electrical, automotive and aviation industries around the world.
