

NCPMK-10 Hydraulic Notching Puncher

Innovators in
Precision Hole
Punching Tools
& Equipment

- The NCPMK-10 notching puncher features the following:
- Easier than using conventional tools such as files, drills & jig saws.
 - No scattering of cut chips or debris.
 - Clean finish on painted metal products after punching.
 - Easy on pre-assembled and finished work.
 - No power source is required thanks to hand operating system.
